

Premium Edition

The picture management tool with the intuitive user interface

The standard for Digital Asset Management: **Picturepark® Premium Edition**

You can manage a wide range of media assets with Picturepark, such as images, graphics, presentations and videos. The communications material is exchanged throughout the company via a central platform. Picturepark can be retrieved 24 hours a day and seven days a week throughout the world via the internet. All the user needs is an address in order to call the central pool for image and media data.

Easy to find

Picturepark visualises all important file formats such as graphics, photographs,

PDF files, presentations and documents. Images are provided in all formats, e.g. for PowerPoint. Videos can be streamed directly. All relevant media assets can be found quickly via the keyword search function or the category trees.

Efficient exchange

Voluminous data such as high-resolution images can easily be sent using Picturepark, via e-mail and download links. User say that Picturepark is very user-friendly. The most important functions are always available and with a few clicks users reach their destination.

«Thanks to the global availability of pictures and presentations, cooperation with communication departments world wide has become easier.»

Edda Walraf, Head Marketing DT, Rieter
